The new EGLO Textile Collection conveys a simple classiness along with warm cosiness. Selected fabrics in subdued natural colours and clear design create a pleasant and friendly living atmosphere. The internal coatings in glamorous gold and trendy silver add a touch of luxury, whereas the colour white provides a purist elegance.

Schlichte Eleganz und warme Behaglichkeit vermitteln die Leuchtenfamilien unserer Textil-Kollektion. Ausgesuchte Stoffe in Naturtönen und klare Formgebung kreieren eine freundliche und geschmackvolle Wohnumgebung. Für einen Hauch von Luxus sorgen die Innenbeschichtungen in edlem Gold und klassischem Silber, während die Farbe Weiß puristisches Flair vermittelt.

La nouvelle collection textile EGLO se caractérise de élégance simple et confort chaleureux. Les tissus sont sélectionnés dans des couleurs sobres et naturelles, ce qui permet de créer une atmosphère de vie agréable et conviviale. Les revêtements intérieurs en or et en argent, tendance glamour, ajoutent une touche de luxe, tandis que le blanc offre une élégance puriste.

smart LIGHTING

The interactive version of light: LED luminaires linked by WLAN - mobile control possible with an App

Smartphones and tablet PCs have become established in the residential area and can wirelessly control almost every end device.

smart LIGHTING is the interactive version of lighting. Up to 50 luminaires can be integrated into the home network, linked to each other and controlled easily with a free App (iOS or Android).

The basic equipment consists of a gateway, a smart LIGHTING LED luminaire and a Smartphone or tablet PC with the installed App.

smart LIGHTING inspires with entirely new lighting options: individually adjustable light moods, pre-defined programmes, adjustable scenes that can be stored and groups that can be managed.
smart LIGHTING can do all of this, and much more!

Die interaktive Variante des Lichts: Über WLAN vernetzte LED-Leuchten - mobil steuerbar via App

Smartphones und Tablet PCs haben ihren Einzug in den Wohnbereich gehalten und steuern drahtlos nahezu alle Endgeräte.

smart LIGHTING ist die interaktive Variante der Beleuchtung. Bis zu 50 Leuchten lassen sich in das Heimnetzwerk integrieren, sind untereinander vernetzt und können so bequem via kostenloser App (iOS oder Android) gesteuert werden.

In der Basisausstattung benötigt man dazu einen Gateway, eine smart LIGHTING LED-Leuchte und ein Smartphone oder einen Tablet PC mit installierter App.

smart LIGHTING begeistert durch völlig neue Beleuchtungsmöglichkeiten: individuell einstellbare Lichtstimmungen, vordefinierte Programme, einstellbare und speicherbare Szenen sowie verwaltbare Gruppen.
Das und mehr kann smart LIGHTING!

La version interactive de la lumière : éclairage sans fil (WLAN) LED en réseau contrôlable depuis un mobile par une appli

Smartphones et tablettes PC ont fait leur entrée dans l'usage domestique et commandent presque tous les appareils sans fil.

smart LIGHTING (lumière intelligente) est la version interactive de l'éclairage. Jusqu'à 50 éclairages s'intègrent au réseau domestique, sont liés entre eux et peuvent être contrôlés de manière pratique par une appli gratuite (IOS ou Android).

Dans l'équipement de base il faut en plus une passerelle (Gateway), une ampoule LED smart LIGHTING et un smartphone ou une tablette PC avec l'appli installée.

smart LIGHTING surprend par ses possibilités d'éclairage complètement nouvelles : ambiances d'éclairage réglables individuellement, programmes prédéfinis, paramétrages et mémorisation des scènes ainsi qu'administration de groupes.
Voici ce que peut faire smart LIGHTING et plus !

The basic equipment for smart LIGHTING comprises the gateway and a smart LIGHTING luminaire.

Additionally, your household also needs a WLAN router and an iOS/Android tablet, a smartphone or an iPod Touch (iOS 7 or higher/Android 4.2 or higher), on which the free OSRAM lightify® App* is installed.

You need an internet connection if you want to control your lighting or save your settings remotely as well.

The App controls up to 50 luminaires.

Zusätzlich dazu muss in Ihrem Haushalt noch ein WLAN-Router sowie ein iOS/ Android Tablet, ein Smartphone oder ein iPod Touch (iOS 7 oder höher/Android 4.2 oder höher), auf dem die kostenlose OSRAM lightify® App* installiert ist, vorhanden sein.

Falls Sie Ihre Beleuchtung auch unterwegs steuern, bzw. ihre Einstellungen speichern wollen, wird hierfür eine Internetverbindung benötigt.

Über die App können bis zu 50 Leuchten verwaltet werden.

*für die Einrichtung eines kostenlosen OSRAM lightify Benutzerkontos ist eine Internetverbindung erforderlich.

Comment fonctionne smart LIGHTING ?

À cela doit s'ajouter dans votre foyer encore un routeur sans fil (WLAN) ainsi qu'une tablette iOS ou Android, un smartphone ou un iPod Touch (iOS 7 ou plus, Android 4.2 ou plus) sur lequel est installée l'appli* gratuite OSRAM lightify®.

Si vous commandez votre éclairage également à distance ou si vous voulez enregistrer vos réglages, vous aurez besoin d'une connexion Internet.

Jusqu'à 50 éclairages peuvent être administrés par l'intermédiaire de cette appli.

*Une connexion Internet est indispensable pour l'ouverture d'un compte utilisateur gratuit OSRAM lightify.

CRI COLOUR RENDERING INDEX

Quality criterion colour rendering

The colour rendering index R_a describes the colour rendering quality of lamps. The higher the R_a value, the less will the artificial light change the colour of an object. The maximum R_a value (e.g. the R_a value of the sun) is 100.

Therefore, lamps with an R_a above 90 will make you look better.

Lamps with an R_a value above 90 are marked with this button:

CRI

Qualitätskriterium Farbwiedergabe

Mit dem Farbwiedergabe-Index R_a wird die Qualität der Farbwiedergabe von Lampen beschrieben. Je höher der R_a-Wert ist, desto weniger verfälscht das künstliche Licht die Farbe von Objekten. Der maximale R_a-Wert (z.B. der Ra-Wert der Sonne) ist 100.

Leuchten mit R_a >90 lassen Sie somit besser aussehen.

Leuchten die einen R_a-Wert von >90 haben, sind mit diesem Button gekennzeichnet:

CRI

Critère de qualité indiquant la restitution des couleurs

L'indice de restitution de couleurs R_a décrit la qualité de restitution des éclairages. Plus la valeur R_a est élevée, moins la lumière artificielle falsifie la couleur des objets. La valeur R_a maximale (par ex. la valeur R_a du soleil) est 100.

Ainsi, favorisez des lampes avec une valeur $R_a > 90$.

Les lampes ayant une valeur $R_a > 90$ sont identifiées par ce bouton :

Dimming without dimmer?

Not a problem for our new step dimming light.

Finding the right dimmer for LED lights is not always easy, and also subject to high costs and consulting effort. EGLO has recognised this trend and offers an optimised and very simple solution.
Our step dimming lights can be dimmed with present switches – wall, cable, housing or foot switches. The dimmer technology is placed in the light and thus saves you the exhausting search for the right dimmer.
By operating the switch several times (switching on/off), the lamp can be adjusted to the desired brightness. There are 3 different brightnesses to choose from: 100%, 50% and 25%. If the light is switched off and on again within 3 seconds, it will automatically switch to the next dimming level. If the light remains off for more than 3 seconds, 100% luminosity will automatically be available again at the next activation – you will not have to switch through all the way the next day.

Overview of the benefits:

No dimmer needed anymore – you can save high procurement costs for a modern LED-capable dimmer.
Present and already-installed lamps can be retrofitted by simply switching to our LED step dimming lights – you will not need to go to the effort of installing a dimmer anymore.
Dimming is easily possible using several switches. Dimming thus becomes possible for alternating/cross circuits without any great technical effort.
Table, floor or wall lamps without a dimmer can be dimmed simply and without great technical effort with our step dimming lights – of course only if they have an integrated switch. Cable, housing or foot switches work.

Note

Our step dimming lights can only be dimmed via the on/off switch –operation with conventional dimmers is not intended and may cause permanent damage to the electronics. The lights are therefore marked „not dimmable" according to the European provisions.

Dimmen ohne Dimmer?

Für unsere neuen Stepdimming-Leuchtmittel kein Problem.

Den passenden Dimmer für LED Leuchtmittel zu finden, ist nicht immer leicht und zudem mit hohen Kosten und Beratungsaufwand verbunden. EGLO hat diesen Trend erkannt und bietet Ihnen eine optimale und denkbar einfache Lösung.

Unsere Stepdimming-Leuchtmittel sind mit bestehenden Schaltern dimmbar – egal ob Wand-, Kabel-, Gehäuse- oder Trittschalter. Die Dimmertechnologie wird in das Leuchtmittel ausgelagert und erspart Ihnen somit die mühsame Suche nach dem passenden Dimmer.

Durch mehrmaliges Betätigen des Schalters (ein-/ausschalten) lässt sich das Leuchtmittel in die gewünschte Helligkeitsstufe bringen. Es stehen Ihnen 3 verschiedene Helligkeitsstufen zur Verfügung: 100%, 50% und 25%.

Wird das Leuchtmittel innerhalb von 3 Sekunden aus- und wieder eingeschaltet, wechselt es automatisch in die nächste Dimmstufe. Bleibt das Leuchtmittel länger als 3 Sekunden ausgeschaltet, stehen Ihnen beim nächsten Einschalten automatisch wieder 100% Leuchtkraft zur Verfügung – Sie ersparen sich also das mühsame Durchschalten am nächsten Tag.

Die Vorteile auf einen Blick:

Kein Dimmer mehr notwendig – Sie ersparen sich somit hohe Anschaffungskosten für einen modernen LED-fähigen Dimmer.

Bestehende und bereits montierte Leuchten lassen sich durch den einfachen Tausch auf unsere LED Stepdimming-Leuchtmittel nachrüsten – es ist keine mühsame Installation eines Dimmers mehr notwendig.

Das Dimmen ist über mehrere Schalter problemlos möglich. So wird Dimmen bei Wechsel-/Kreuzschaltungen ohne hohen technischen Aufwand realisierbar.

Tisch-, Steh- oder Wandleuchten, welche ohne Dimmer ausgerüstet sind, werden mit unseren Stepdimming-Leuchtmittel einfach und ohne großen technischen Aufwand dimmbar – natürlich sofern diese über einen integrierten Schalter verfügen – egal ob Kabel-, Gehäuse- oder Trittschalter.

Hinweis

Unsere Stepdimming-Leuchtmittel sind nur über Ein-/Ausschalter dimmbar – der Betrieb mit konventionellen Dimmern ist nicht vorgesehen und könnte die Elektronik dauerhaft beschädigen. Die Leuchtmittel werden daher gemäß europäischer Vorschriften als „nicht dimmbar" gekennzeichnet.

Dimming sans gradateurs?

Pour nos nouvelles ampoules Stepdimming pas de problème.

Trouver les bons gradateurs pour lampes à LED, est pas toujours facile et également associé à des coûts élevés et les frais de consultation. EGLO a reconnu cette tendance et offre une solution optimale et très simple.

Nos lampes Stepdimming sont des commutateurs existants graduables - si l'interrupteur mural, câble, le logement ou le pied. La technologie gradateur est confiée à des lampes et vous évite ainsi la recherche fastidieuse pour le gradateur parfait.

En appuyant plusieurs fois l'interrupteur (on / off) peut être amené dans le niveau de luminosité souhaité, les ampoules. Il y a 3 niveaux de luminosité différents: 100%, 50% et 25%.

Si les lampes hors en 3 secondes et à nouveau enclenchés, il passe automatiquement à la prochaine variation. Si les lampes pendant plus de 3 secondes, vous automatiquement 100% de luminosité après l'arrêt à nouveau disponible - donc vous pouvez vous épargner les tracas de commutation à travers le lendemain.

Les avantages en un coup d'oeil:

Non gradateur plus nécessaire - vous donc vous épargner le coût élevé d'un moderne LED compatible gradateur.

Existants et luminaires déjà montés peuvent être modernisés par le simple échange de nos ampoules LED Stepdimming - aucune installation fastidieuse d'un gradateur plus nécessaire.

Dimming est possible sans problème sur plusieurs commutateurs. Donc, la gradation à change / cross-connects sans grand effort technique est réalisable.

Table, sol ou de mur lumières, qui ne sont pas équipés de gradateurs, sont dimmable avec nos lampes Stepdimming simplement et sans grand effort technique - bien sûr à condition qu'ils aient un commutateur intégré - si le câble, le logement ou le commutateur de pied.

Allusion

Nos lampes Stepdimming ne sont que commutateur marche / arrêt baissable - fonctionnant avec des variateurs classiques ne sont pas destinés et pourraient endommager de façon permanente l'électronique. Les lampes sont marqué «non-dimmable" conformément à la réglementation européenne.

Energieeffizienz-Label

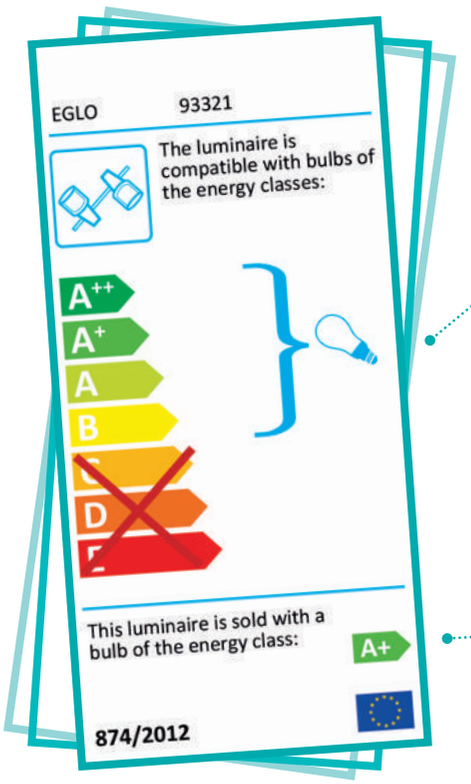
Energy efficiency labels

Label de l'efficacité énergétique

LED luminaires are increasingly popular and the demand for energy-efficient solutions is gaining strength. This has resulted in the adoption of several EU regulations prescribing the energy efficiency labelling of light sources and luminaires. We have prepared a brief overview of the new energy labels.

LED Leuchtmittel sind am Vormarsch, der Ruf nach energieeffizienten Lösungen wird immer größer. In den letzten Jahren wurden daher mehrere EU-Verordnungen verabschiedet, die die Kennzeichnung der Energieeffizienz bei Leuchtmitteln und Leuchten vorschreibt. Hier finden Sie eine kurze Übersicht der neuen Energieeffizienzkennzeichnung.

Les éclairages LED gagnent du terrain, la demande de solutions efficaces en énergie ne cesse de croître. C'est la raison pour laquelle plusieurs directives européennes prescrivant le marquage de l'efficacité énergétique des moyens d'éclairage et des lampes ont été promulguées au cours de ces dernières années. Vous trouverez ici un bref aperçu d'ensemble des nouveaux marquages de l'efficacité énergétique.



The information in brackets at the centre of the label indicates which bulbs may be used for the luminaire. In this case, the product is only compatible with bulbs with an energy efficiency rating of better than C.

Die Klammer in der Mitte des Labels gibt an, mit welchen Leuchtmitteln die Leuchte kompatibel ist. In diesem Fall dürfen nur Leuchtmittel verwendet werden, deren Energieklasse effizienter als C ist.

La parenthèse au milieu du label indique les moyens d'éclairage avec lesquels la lampe est compatible. Il est seulement permis dans ce cas d'utiliser des moyens d'éclairage dont la classe d'énergie présente une efficacité supérieure à C.

If bulbs are included with the luminaire, their energy classes are indicated at the bottom of the label.

Falls Leuchtmittel inkludiert sind, wird deren Energieklasse im unteren Teil des Labels angegeben.

Si des moyens d'éclairage sont inclus, leur classe énergétique est indiquée dans la partie inférieure du label.

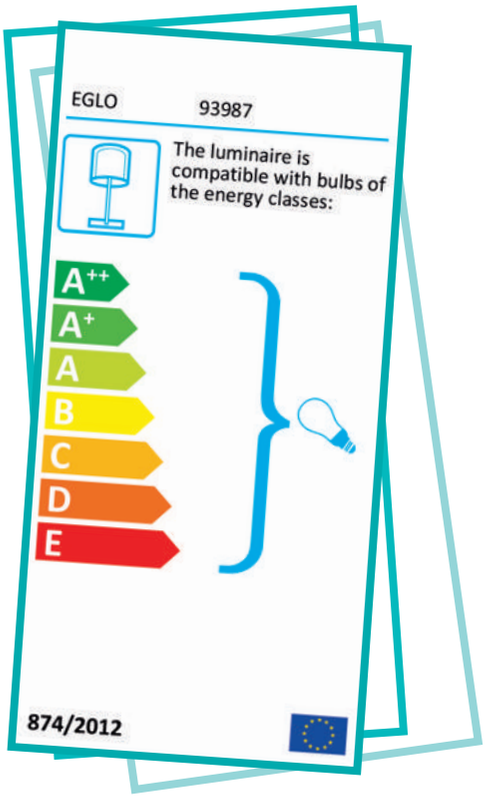
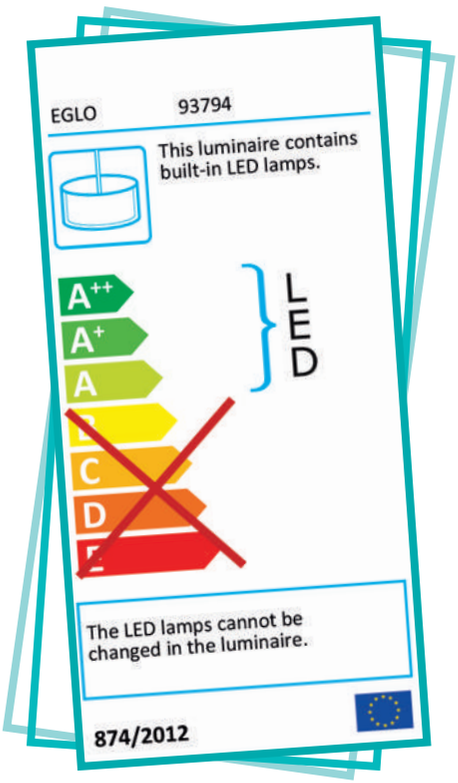
This label indicates that no bulbs are included with the luminaire. Consumers are free to choose their preferred bulb within the indicated energy classes.

Dieses Label wird verwendet, wenn die Leuchte ohne Leuchtmittel ausgeliefert wird. Der Kunde kann selber entscheiden, welches Leuchtmittel der angegebenen Klassen verwendet wird.

Ce label est utilisé lorsque la lampe est livrée sans ampoules. Le client peut décider lui-même quel ampoule des classes indiquées est utilisé.





This label indicates that the luminaire is sold with built-in LED lamps that cannot be replaced by the consumer himself.

Dieses Label wird verwendet, wenn Leuchten mit LED-Modulen verkauft werden, die vom Endkunden nicht selbstständig ausgetauscht werden können.

Ce label est utilisé lorsque des lampes sont vendues avec des modules LED ne pouvant pas être changés par les clients finaux eux-mêmes.

LUMINIOUS COLOUR / FLUX
LICHTFARBE / -STROM
COULEUR / FLUX LUMINEUX

The colours of the LED are represented as pictogrammes (see below), their luminous flux directly beneath. The luminous flux is quoted in lumen and describes the amount of light generated by the LED. The higher the value, the brighter is the lamp. Lumens are LED boards and are the light measurement value in bulbs.

Die Farben der LED werden als Piktogramm (siehe unten) dargestellt, deren Lichtstrom direkt darunter. Der Lichtstrom wird in Lumen gemessen und gibt die erzeugte Lichtmenge der LED an. Je höher der Wert, desto heller das Produkt. Lichtstromangaben (Lumen) sind Platinen- bzw. Leuchtmittelwerte.

Les couleurs de LED ont représentés sous forme de pictogrammes, leur flux lumineux directement en dessous. L'unité de flux lumineux est le lumen et il mesure la quantité de lumière générée par les LED. Plus la valeur est élevée, plus la lampe est lumineuse. Les lumens sont l'unité de mesure de l'intensité lumineuse des ampoules et des panneaux led integrés.
